Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19, drawn to a three-point apparatus, classified in class 172, subclass 439.
- II. Claim 20, drawn to a three-point sprayer, classified in class 239, subclass 172.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination (invention II) as claimed does not require the particulars of the subcombination (invention I) as claimed because the three-point sprayer (claim 20) does not require the particulars of the three-point apparatus comprising a suspension system coupled between the base of the hitch system and the implement as set forth in independent claim 1. The subcombination has separate utility such as being used with other agricultural implements such as a planter, scraper or harvester.

Art Unit: 3671

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
